Incident Response Runbook

Severity 1 incidents (production down or data loss) must be acknowledged within 15 minutes by the on-call engineer. Severity 2 incidents must be acknowledged within 1 hour.

The incident commander posts an update on the status page every 30 minutes until the incident is resolved. The on-call rotation changes weekly on Monday at 09:00 UTC.

After the incident

A blameless postmortem must be written within 5 business days of every Severity 1 incident. The postmortem lists the timeline, the root cause, what went well and the follow-up actions with owners and due dates.
